

deTec4 Core / deTec2 Core

EFFICIENT INTEGRATION. QUICK INSTALLATION. SIMPLY SAFE.

Safety light curtain

SICK
Sensor Intelligence.

DETEC4 CORE / DETEC2 CORE: PURE SAFETY FROM THE MARKET LEADER

SICK, creator of the safety light curtain, is the world's leading manufacturer of optical safety devices. SICK is now introducing a completely new generation of light curtains – the deTec4 Core and the deTec2 Core.

With this development, SICK is focusing on the essentials: state-of-the-art safety.

A new standard in every sense

The deTec4 Core and deTec2 Core safety light curtains makes it easier than ever before to cost-effectively protect hazardous zones and access points. The deTec family is efficient to integrate, quick to install and safe in routine operation – deTec4 Core or deTec2 Core is also the best-in-class safety light curtain in each case.

- Efficient integration → Page 4
- Quick installation → Page 8
- Simply safe → Page 10

Based on more than 60 years of experience

The development and production of safety light curtains has been one of SICK's core areas of competency for more than six decades. Our safety light curtains are proven in the field - through their widespread use worldwide in a multitude of applications. Economic factors are also an important consideration, in addition to safety matters. Optimally designed safety technology with user-oriented functionality is key to increasing system efficiency. Of course, it goes without saying that SICK utilizes open systems that ensure a high level of investment security.

DETEC4 CORE SAFETY LIGHT CURTAIN: ECONOMICAL AND RELIABLE DURING OPERATION

The deTec4 Core safety light curtain is the perfect solution for cost-effective protection of hazardous points and single-sided access protection. In doing so, safety is made easy right from the outset.

Safety and efficiency combined – for maximum availability

Day for day, the deTec4 Core safety light curtain ensures safety of personnel and productivity of machines and systems in a cost-effective manner for many industries. For example, machines for processing workpieces of all dimensions.

Typical areas of application include:

- Machine tools industry
- Automotive
- Handling and warehousing systems
- Consumer goods and packaging industry

deTec4 Core safety light curtain for a wide range of safety applications

Finger and hand detection

Hand and person detection

Single-sided access protection

EFFICIENT INTEGRATION – FROM PLANNING TO SELECTION AND INSTALLATION

In the event of minimal space: continuous protective fields

The complete housing of the deTec4 Core safety light curtain generates a continuous protective field with high resolution right up to the ends of the housing. This minimizes the safety distances in terms of machine integration. And, with protective field heights of up to 2100 mm, the deTec4 Core safety light curtain also reduces allowances for reaching under and reaching over the protective field in accordance with current safety standards. An additional advantage: short safety distances for the operator to hazardous points accelerates processes with higher productivity.

deTec4 Core – the technology at a glance

- Type 4 (IEC 61496), SIL3 (EN 62061), PL e (EN ISO 13849)
- No blind zones
- Resolution of 14 mm or 30 mm
- Protective field height of 300 mm to 2,100 mm
- Automatic calibration on the protective field width up to 10 m range
- Ambient operating temperature of –30 °C to +55 °C
- Enclosure rating IP 65 and IP 67
- Flexi Loop compatible M12 male connectors

deTec4 Core safety light curtain

DETEC2 CORE SAFETY LIGHT CURTAIN FOR TYPE 2: SAFETY AND SIMPLE HANDLING

The deTec2 Core clearly implements the central concepts of pure safety for the machine and its operators in a way which is extremely clear for both the integrator and the machine operator. Each product family is designed for specific applications and ambient conditions.

Safety for defined protection levels

According to the risk assessment, typical PL c and/or SIL1 applications include machines with a low injury potential or low levels of access by the operator. Common examples are assembly work stations, loading systems with rotating tables or mobile trays, test devices, or even riveting and pasting machines.

Typical areas of application include:

- Machine tools industry: handling & assembly
- Food & Beverage
- Packaging industry

deTec2 Core safety light curtain for a wide range of safety applications

Finger and hand detection

Hand and person detection

Single-sided access protection

INTUITIVE AND RUGGED IN DAILY USE

Just switch it on: safe without setup, quick service and diagnosis

Externally, the deTec2 Core has a rugged and clean design – which is sure to satisfy in terms of functionality. The deTec2 Core is designed purely for protective operation. There is no need for extensive configuration work; the safety light curtain is active as soon as it is switched on. The deTec2 Core ensures exact adjustment of its own sensing range. The integrated four-LED alignment display also ensures fast and accurate positioning of the sender and receiver in relation to each other. A red/green LED displays the current operational status of the safety light curtain clearly.

deTec2 Core – the technology at a glance

- Type 2 (IEC 61496), SIL1 (EN 62061), PL c (EN ISO 13849)
- No blind zones
- Resolution of 14 mm or 30 mm
- Protective field height of 300 mm to 2,100 mm
- Automatic calibration on the protective field width up to 10 m range
- Ambient operating temperature of –30 °C to +55 °C
- Enclosure rating IP 65 and IP 67
- Flexi Loop compatible M12 male connectors

SOPHISTICATED DESIGN FOR RAPID INSTALLATION

The deTec4 Core and the deTec2 Core safety light curtains are impressive with minimal commissioning and maintenance requirements. An innovative system of brackets as well as rapid alignment and diagnostics with the help of integrated status indicators.

Mounting and alignment in seconds

The mounted deTec4 Core or deTec2 Core safety light curtain can be rotated $\pm 15^\circ$ on the machine thanks to its FlexFix bracket – greatly facilitating the alignment process. The semi-circular contours on the rear of the housing additionally enable positioning of the bracket on various parts of the housing. The safety light curtain can be mounted without blind zones regardless of where the bracket is placed on the housing.

Saves time thanks automatic calibration on the protective field width

The new “automatic calibration on the protective field width” function is impressive during initialization. The deTec4 Core or the deTec2 Core automatically measures the scanning range following the mounting and alignment processes. This means that it requires no configuration and is always optimally set up.

DEVELOPED FOR ULTIMATE EASE

LEDs enable fast commissioning

As all basic functions of the deTec4 Core and deTec2 Core safety light curtain are available without prior configuration, the commissioning process can be carried out without the need for software. Moreover, the safety light curtain cuts down commissioning time thanks to its integrated LEDs and diagnostic functions.

Plug-and-play maintenance and exchange

Maintenance tasks can be carried out quickly on the deTec4 Core or deTec2 Core safety light curtain without the need for configuration or wiring. Its sophisticated bracket design and standardized 5-pin M12 connection technology additionally simplifies the rapid exchange of individual devices. Bright LEDs provide continuous status information for all processes.

→ Direct feedback during alignment: the optimal position of the two housings relative to each other is indicated by the four blue LEDs.

RUGGED HOUSINGS FOR HARSH PRODUCTION ENVIRONMENTS

Protecting people every day, keeping machines available and always keeping economic efficiency in mind – no problem for the solid deTec4 Core or deTec2 Core safety light curtain.

Impact-resistant housing, completely re-designed

An ingenious combination of metal and synthetic components make the safety light curtain of the deTec family extremely rugged. This means it easily withstands even hard impacts and safety is ensured at all times.

No blind zones: flexible system integration

The deTec4 Core or deTec2 Core safety light curtain can always be optimally positioned, regardless of the available installation points for brackets on the machine frame. Its complete lack of blind zones and bracket design offers a high degree of flexibility in terms of machine integration.

Reliability with IP 67 rating

High availability is guaranteed for applications in harsh environments. The safety light curtain fulfills the requirements of IP 65 as well as IP 67 in a single device.

Temperature resistant up to -30 °C

The safety light curtain is designed for operating temperatures between -30 °C and +55 °C for consistent safety in all operational conditions. This means it is suitable for refrigerated areas where it provides accident-free and cost-effective processes.

SIMPLY SAFE – PROVEN EXPERTISE FROM SICK.

Uncomplicated integration into safety controllers

Just like all of SICK's safety devices, the deTec4 Core and the deTec2 Core safety light curtain were especially developed so that it can be integrated into all standard controllers without additional effort. This means that SICK's industry-leading expertise offers perfect integration into all safety and system environments in the area of machine safety.

Complete solutions with safetyPLUS®

safetyPLUS® from SICK offers comprehensive solutions for industrial automation – including development and services:

- Application-oriented functions and trend-setting products that increase your system efficiency
- Incorporating the currently applicable international standards in order to support your business all over the world
- Services that range from realization of your ideas through to regular maintenance
- Tools for safety engineering
- A full range of services to support the safety functions in your machines and systems

EFFICIENT INTEGRATION. QUICK INSTALLATION. SIMPLY SAFE.

Product description

The deTec4 Core safety light curtain is impressive with a new innovative system of brackets, no blind zones, and the increased height of its protective field. The effort required for commissioning and maintenance is minimized. The half-rounded contour of the rear of the housing enables the brackets to be positioned in any location on the housing. The FlexFix bracket facilitates alignment at up to $\pm 15^\circ$. Integrated LED displays, diagnostic functions, and automatic calibration on the protective field width

help to save time and costs during commissioning. The deTec4 Core is also suitable for use in harsh ambient conditions thanks to the enclosure rating IP 65 and IP 67. With ambient operating temperatures of between -30°C and $+55^\circ\text{C}$, the safety light curtain can also be used in low-temperature environments. The deTec4 Core provides reliable hand and finger protection at the highest PL e protection level. The available protective field heights range from 300 mm to 2,100 mm.

At a glance

- Type 4 (IEC 61496), SIL3 (EN 62061), PL e (EN ISO 13849)
- Absence of blind zones
- Resolution of 14 mm or 30 mm
- Protective field height of 300 mm to 2,100 mm
- Automatic calibration on the protective field width up to 10 m range
- Ambient operating temperature of -30°C to $+55^\circ\text{C}$
- Enclosure rating IP 65 and IP 67
- Flexi Loop-compatible M12 male connector

Your benefits

- Simple assembly with innovative mounting and no blind zones
- Quick commissioning thanks to integrated LED display and automatic calibration on the protective field width up to 10 m range
- Simply safe: rugged and reliable thanks to enclosure rating IP 67 and an ambient operating temperature down to -30°C , enabling use in harsh ambient conditions
- Intelligently standardized: M12, 5-pin provide cost reductions and enables a safe series connection with Flexi Loop
- Basic function without configuration effort enables quick replacement when servicing is required

deTec safety light curtain connected to UE48-20S safety relay

E114585/01/2014-05-08

The deTec4 Core safety light curtain can be connected to the UE48-20S switching amplifiers. It is operated with restart interlock and external device monitoring.

When the protective field is clear, the OSSD1 and OSSD2 outputs carry voltage. The system can be switched on when K1 and K2 are in the de-energized position. Pressing the S1 button switches on the UE48 switching amplifier. Contacts 13-14 and 23-24 of the UE48 activate the K1 and K2 contac-

tors. When the protective field is interrupted, the OSSD1 and OSSD2 outputs carry no voltage. The UE48 switches off and K1, K2 are deactivated.

Failure of K1 and K2 does not cause the loss of the shut-down function. Cross-circuits and shortcircuits of the OSSD1 and OSSD2 outputs are recognized and lead to the locking state. It is recognized if the K1 or K2 contactors does not de-energize.

Product description

The deTec2 Core safety light curtain is impressive with a new innovative system of brackets, no blind zones, and the increased height of its protective field. The effort required for commissioning and maintenance is minimized. The half-rounded contour of the rear of the housing enables the brackets to be positioned in any location on the housing. The FlexFix bracket facilitates alignment at up to $\pm 15^\circ$. Integrated LED displays, diagnostic functions, and automatic distance measurements help to save

time and costs during commissioning. The deTec2 Core is also suitable for use in harsh ambient conditions thanks to the enclosure rating IP 65 and IP 67. The deTec2 Core provides reliable hand and finger protection at PL c protection level. With ambient operating temperatures of between -30°C and $+55^\circ\text{C}$, the safety light curtain can also be used in low-temperature environments. The available protective field heights range from 300 mm to 2,100 mm.

At a glance

- Type 2 (IEC 61496), SIL1 (EN 62061), PL c (EN ISO 13849)
- Absence of blind zones
- Resolution of 14 mm or 30 mm
- Protective field height of 300 mm to 2,100 mm
- Automatic calibration on the protective field width up to 10 m range
- Ambient operating temperature of -30°C to $+55^\circ\text{C}$
- Enclosure rating IP 65 and IP 67
- Flexi Loop-compatible M12 male connector

Your benefits

- Simple assembly with innovative mounting and no blind zones
- Quick commissioning thanks to integrated LED display and automatic calibration on the protective field width up to 10 m range
- Simply safe: rugged and reliable thanks to enclosure rating IP 67 and an ambient operating temperature down to -30°C , enabling use in harsh ambient conditions
- Intelligently standardized: M12, 5-pin provide cost reductions and enables a safe series connection with Flexi Loop
- Basic function without configuration effort enables quick replacement when servicing is required

Safety-related parameters

Type	Type 2 (EN 61496)
Safety integrity level	SIL1 (IEC 61508) SILCL1 (EN 62061)
Category	Category 2 (EN ISO 13849)
Performance level	PL c (EN ISO 13849)
PFHd (mean probability of a dangerous failure per hour)	3.1×10^{-8} (EN ISO 13849)
T _M (mission time)	20 years (EN ISO 13849)
Safe state in the event of a fault	At least one OSSD is in the OFF state.

Performance

Resolution	14 mm	30 mm
Protective field height	300 mm ... 1,200 mm (depending on type)	300 mm ... 2,100 mm (depending on type)
Scanning range	0 m ... 7 m	0 m ... 10 m
Response time	11 ms ... 16 ms (depending on type)	10 ms ... 14 ms (depending on type)
Synchronization	Optical synchronisation	

Interfaces

Connection type	M12, 5-pin
Permitted cable length	≤ 50 m

Electrical data

	Sender	Receiver
Protection class	III (EN 50178)	
Supply voltage V _s	24 V DC (19.2 V DC ... 28.8 V DC)	
Ripple	≤ 2.4 V _{pp} ¹⁾	
Power consumption typical	0.82 W (DC) ... 1.68 W (DC) (depending on type)	1.63 W (DC) ... 3.36 W (DC) (depending on type)
Safety outputs (OSSD)		
Type of output	–	2 PNP semiconductors, short-circuit protected, cross-circuit monitored ²⁾
Switching voltage HIGH	–	24 V DC (V _s – 2.25 V DC ... V _s)
Switching voltage LOW	–	≤ 2 V DC
Switching current	–	≤ 300 mA

¹⁾ Within the limits of V_s.

²⁾ Applies to the voltage range between –30 V and +30 V.

Mechanical data

	Sender	Receiver
Housing cross-section (incl. system connection)	34 mm x 30.7 mm	
Weight	290 g ... 1,920 g (depending on type)	300 g ... 1,930 g (depending on type)

Ambient data

Enclosure rating	IP 65 (EN 60529) IP 67 (EN 60529)
Ambient operating temperature	-30 °C ... +55 °C
Storage temperature	-30 °C ... +70 °C
Air humidity	15 % ... 95 %, non-condensing
Vibration resistance	5 g, 10 Hz ... 55 Hz (EN 60068-2-6)
Shock resistance	10 g, 16 ms (EN 60068-2-29)

Ordering information

Items supplied deTec2 Core:

- Safety light curtain consisting of a sender and a receiver
- 4 QuickFix brackets
- Test rod with diameter corresponding to the resolution of the safety light curtain
- Operating instructions on CD-ROM
- Adhesive label with information on the daily check

- **Resolution:** 14 mm
- **Scanning range:** 0 m ... 7 m

Connection diagrams

deTec safety light curtain connected to UE48-20S safety relay

The deTec2 Core safety light curtain can be connected to the UE48-20S switching amplifiers. It is operated with restart interlock and external device monitoring.

When the protective field is clear, the OSSD1 and OSSD2 outputs carry voltage. The system can be switched on when K1 and K2 are in the de-energized position. Pressing the S1 button switches on the UE48 switching amplifier. Contacts 13-14 and 23-24 of the UE48 activate the K1 and K2 contac-

tors. When the protective field is interrupted, the OSSD1 and OSSD2 outputs carry no voltage. The UE48 switches off and K1, K2 are deactivated.

Failure of K1 and K2 does not cause the loss of the shut-down function. Cross-circuits and shortcircuits of the OSSD1 and OSSD2 outputs are recognized and lead to the locking state. It is recognized if the K1 or K2 contactors does not de-energize.

Accessories required for commissioning

SICK AT A GLANCE

SICK is a leading manufacturer of intelligent sensors and sensor solutions for factory, logistics, and process automation. With more than 6,000 employees and over 40 subsidiaries worldwide, we are always close to our customers. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in various industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services round out our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is “Sensor Intelligence.”

Worldwide presence:

Australia, Belgium/Luxembourg, Brasil, Česká republika, Canada, China, Danmark, Deutschland, España, France, Great Britain, India, Israel, Italia, Japan, Magyarország, México, Nederland, Norge, Österreich, Polska, România, Russia, Schweiz, Singapore, Slovenija, South Africa, South Korea, Suomi, Sverige, Taiwan, Türkiye, United Arab Emirates, USA.

Please find detailed addresses and additional representatives and agencies in all major industrial nations at: www.sick.com
