

Basics for 2 way cartridge valves type LI

ISO 7368 size from 16 to 100

Modular cartridge valves realize pressure, flow, directional and check controls and are composed by a 2-way cartridge housed in a recess of standard dimensions and by a closing functional element ① called "cover".

The cartridge is composed by an hydraulically piloted poppet ② sliding into a drilled sleeve ③; spring ④ keep the poppet closed in resting position.

Poppet is hydraulically piloted by means of internal connections in the cover (X, F, Z1, Z2, Y). External pilot line can operate directly or by means of solenoid valve or pressure relief valves housed in the cover.

Many different covers are available, each providing a different function to realize a complete range of valves and allow the development of any electrohydraulic circuit for the control of machines and systems, see section 4, 5, 6, 7.

Poppets may have different geometrical shapes and area ratios as described in section 8, to optimize pressure, flow and directional controls.

These valves are available in standard sizes 16 to 100 according to ISO 7368 (DIN 24342).

Flow up to 8000 l/min at $\Delta p = 6$ bar, pressure up to 350 bar.

Atos also realizes integrated electrohydraulic blocks customized to the application by combining ISO components and cartridge valves within compact functional manifolds.

Proportional cartridge valves are also available, see tab. F300 to F340.

1 MODEL CODE FOR COVERS

LI	MHA	-2	/210	-I	X	24DC	**	/*	X**
Cover according to ISO 7368							Voltage code	Series number	Special orifices setting
Function and type of control see section 4, 5, 6, 7.									Seals material: - = NBR PE = FKM BT = HNBR
Size: 1 = 16 3 = 32 5 = 50 8 = 80 2 = 25 4 = 40 6 = 63 10 = 100									
Pressure range control (only for LIM*, LIRA, LICM): 50 = 6 ÷ 50 bar; 100 = 8 ÷ 100 bar; 210 = 10 ÷ 210 bar; 350 = 15 ÷ 350 bar;									
									X = without connector 00 = solenoid valve without coils (for DHI) 00-AC = AC solenoid valve without coils (for DHE) 00-DC = DC solenoid valve without coils (for DHE)
									Pilot valve: -I = DHI with cURus certified solenoids -E = DHE with cURus certified high performances

2 MODEL CODE FOR CARTRIDGES

SC LI	- 25	31	2	**	/*
Cartridge according to ISO 7368				Series number	Seals material: - = NBR PE = FKM BT = HNBR
Size, the same of relevant cover: 16 = 16 40 = 40 80 = 80 25 = 25 50 = 50 100 = 100 32 = 32 63 = 63 see section 8					
Type of poppet: see section 8					
					Spring cracking pressure, see the specific valve tables for the available cracking pressure: 1 = 0,3 bar 3 = 3 bar 6 = 5,5 bar 2 = 1,5 bar 4 = 4 bar 7 = 7 bar

3 HYDRAULIC CHARACTERISTICS AND RECESS DIMENSIONS

Sizes	Qmax [l/min] $\Delta p = 6$ bar				Recess dimensions [mm]

- normally available from stock
- on request
- not available

(1) It is the ratio of the area on which the main pressure of the circuit is applied to the area on which the pilot pressure is applied. For example "1:2" means: 1 = area on which the main pressure of the circuit is applied; 2 = area on which the pilot pressure is applied.
