Miniature Diaphragm Pumps Precision Fluidics

ENGINEERING YOUR SUCCESS.

ENGINEERING YOUR SUCCESS.

When you partner with the global leader in motion and control technologies, expect to move your business and the world forward. From miniature solenoid valves to highly integrated automation systems, our innovations are critical to life-saving medical devices and scientific instruments used for drug discovery and pathogen detection. Not to mention, critical to decreasing time to market and lowering your overall cost of ownership. So partner with Parker, and get ready to move, well, anything.

T2-05

Micro Pumps (air/gas)

Up to 650 mLPM Free Flow

Typical Applications

- Industrial Hygiene
- Medical Instruments
- Air over Liquid Control
- Combustion Analyzers
- Trace Detection

Designed to fit where other pumps can't, the T2-05 DC motor-driven pump's extra small size and high efficiency reduce footprints and extend battery life. The motor, pump head, and valve combination provide reliable, long life operation. Our smallest pump was designed for applications where low power, small size, and light weight are critical. Unique valve design minimizes leakage to maximize flow.

Features

• High Efficiency

The valve design has been optimized to provide the highest flowrates available with the lowest power draw. Low power leads to longer battery life and smaller instrument size.

Long Life

The wear components of these pumps have been designed to provide maximum life. Many applications for these pumps require 10,000+ hours of operation.

• Small Size and Lightweight

The pumps fit into the extremely tight spaces demanded of today's handheld instruments, such as portable gas detectors. The lightweight design keeps instrument weight minimized.

• Intrinsic Safety Capability

The high efficiency ironless core motor can satisfy intrinsic safety requirements. It has been proven in applications for sampling of hazardous gases, vapors, and aerosols in a range of fixed and portable instruments.

Performance Data

T2-03

Micro Pumps (air/gas)

Up to 2.5 LPM Free Flow

Typical Applications

- Industrial Hygiene
- Medical Instruments
- Aerosols and Particle Analysis
- Air over Liquid Control
- Combustion Analyzers
- Trace Detection
- Fixed Gas Detectors

The T2-03 DC motor-driven pump line is a miniature powerhouse ideal for use in portable air and gas applications. The pump head and patented valve design provide reliable, highly efficient, long life operation. Size and power draw are minimized. The pumps are available in "Compact" (high efficiency ironless core motor), "eCompact" (iron core brush motor), and "HP" (premium duty brush motor). Motor choice is driven by application requirements.

Features

High Efficiency

The patented valve design has been optimized to provide the highest flowrates available with the lowest power draw. Lower power results in longer battery life and smaller instrument size. A

• Long Life

CTS Series

2.5 LPM Free Flow

CTS coreless motor shown

Typical Applications

- Gas Analyzers
- Patient Monitoring
- CO2 Monitors

Micro Pumps (air/gas)

CTS Micro Diaphragm Pumps and Compressors are a series of brushless, brush and coreless D.C. motor-driven pumps tailored to meet the specific performance requirements of your applications.

Features

• Longevity:

The CTS Series pump sets the highest benchmark for service free life expectancy, with our advanced proprietary diaphragm elastomer. Brushless DC motors are selected for long life; brush motors for low cost; and coreless motors for maximum energy efficiency.

• Lightweight, Compact Size:

The CTS Series pump design has a unique compact configuration. • Contamination-Free:

Parker takes the necessary steps in manufacturing to assure that our 100% oil free pump and compressor designs maintain the purity of your system. Parker pumps and compressors are commonly used in FDA-approved systems.

• Dynamically Balanced:

The CTS Series pump design is uniquely balanced to minimize noise and maximize life.

Performance Data

Physical Properties

Operating Environment: 41 to 122°F (5 to 50°C) Media: Most Gases Humidity: 0 – 95% RH Wetted Material: Diaphragm/Valves: EPDM, AEPDM Head: PSU Screw: 18-8 Stainless

Operating Environment: 41 to 158°F* (5 to 70°C*) *Duty dependent. Consult factory for high temperature applications over 50° C Media: Most Gases and Liquids Humidity: 0-95% RH **Noise Level:** As low as 45 dB Wetted Material: EPDM, AEPDM, Fluorocarbon, Teflon/EPDM Laminate Valves: EPDM, AEPDM, Perfluoro, Fluorocarbon **Pump Head:** Vectra (Liquid Crystal Polymer)

BTC Miniature Diaphragm Pumps and Compressors are a series of brush and brushless DC motor driven pumps designed to handle air and gases. The innovative, compact design incorporates leading edge technologies that allow it to operate harder, hotter, quieter and londer than existing pump designs. The BTC Series offers multiple component configurations allowing them to be used for either vacuum operation, pressure operation, or alternating vacuum and pressure operations.

Features

• Highest Performance/Size Ratio:

innovative and efficient engineering designs enable the BTC Series to push the performance envelope in a lightweight, compact size.

• Runs in Hotter Environments:

Mini Pumps (air/gas)

Selection of advanced materials and our proprietary elastomer diaphragms and valves allow our pumps to operate in increased temperature environments up to 158°F (70°C).

• Performs Quieter:

Optimized head, chamber, and flow path reduce noise without compromising performance.

• Lasts Reliably Longer:

Using our proprietary advanced diaphragm elastomer and superior brushless motor design sets the highest benchmark for service-free operation that exceeds 10,000 hours.

• Installs Easily:

Incorporating the lightweight EZ Mount facilitates simple system assembly while dampening vibration and reducing noise levels.

А

T2-04 Up to 7.5 LPM Free Flow

Mini Pumps (air/gas)

Typical Applications

- Industrial Hygiene
- Medical Instruments
- Air over Liquid Control
- Trace Detection
- Fuel Cells
- Particle & Aerosol Sampling

The T2-04 is a twin head pump with single set of ports that is ideal for higher suction flows in portable gas sampling systems. A unique double diaphragm design minimizes losses inside the pump. With flows up to 7.5 LPM, the efficiency of this pump is without equal. The motor, pump head, and valve combination provide reliable, long life operation. The pump was designed for higher flow suction applications where low power, small size, and light weight are critical.

Features

• High Efficiency

The double diaphragm and patented valve design have been optimized to provide the highest flowrates available with the lowest power draw, especially in vacuum applications. Low power leads to longer battery life and smaller instrument size.

Long Life

The wear components of these pumps have been designed to provide maximum life while maintaining high efficiency.

• Small Size and Lightweight

The pumps fit into the tight spaces demanded of today's battery powered instruments. The lightweight design keeps instrument weight minimized. A single set of barbs provides twice the flow and eliminates tubing 'nests' in the system.

• Intrinsic Safety Capability

The high efficiency ironless core motor can satisfy intrinsic safety requirements. It has been proven in applications for sampling of medical gases, hazardous gases, particles, and aerosols in a range of fixed and portable instruments.

Performance Data

Physical Properties

Operating Environment: 32 to 122°F (0 to 50°C) Wetted Material: Neoprene Rubber, Silicone, Polyphthalamide (PPA)

BTC-II Series

6 or 11 LPM Free Flow

Mini Pumps (air/gas)

BTC-II Dual Head Miniature Diaphragm Pumps and Compressors are a series of brush DC motor-driven pumps tailored to meet the specific performance requirements of your applications. These pumps are designed to handle both gases and liquids.

Features

• Longevity:

The BTC-II is configured with a dual ball bearing brush motor, along with our long life pump head technology. The pump will last the life of the motor, or up to 3,000 hours of high intermittent usage. For exceptional life performance with our BLDC motor, use the BTC-IIS.

• Light Weight, Compact Size:

The BTC-II Series pump design has a unique compact configuration allowing designers to minimize system weight and allotted space requirement for pumps and compressors.

• Flexible Mounting Options:

The BTC-II maximizes mounting flexibility by offering several ways to mount the pump, as well as four possible port orientations.

• Contamination-Free:

Parker takes the necessary steps in manufacturing to assure that our 100% oil-free pump and compressor designs maintain the purity of your system. Parker pumps and compressors are commonly used in FDA-approved systems.

• Dynamically Balanced:

The BTC-II Series pump design is uniquely balanced to minimize vibration and maximize life.

LTC Series

650 mLPM Free Flow

LTC Series brushless motor shown

Typical Applications

- Large Format Printers
- Urinalysis
- Photo Processing Printers

Mini Pumps (liquids)

LTC Series Liquid Pumps are offered in both brush and brushless DC motor drives that can be configured for your specific performance requirements. These pumps are designed to handle a wide range of liquid and gas media.

Features

• Patented Fluid-Blok™ Advanced Sealing Technology*:

- Redundant sealing techniques eliminate leaks.
- Self-Priming/Dry Running:

Monolithic diaphragm design allows for maximum suction/priming and continuous dry operation.

• Longevity:

Unique brushless DC motor design and advanced proprietary diaphragm elastomer gives the highest benchmark for service-free life.

• Low Power Consumption:

Advanced flow path and efficient valve system design allows for maximum flow with low power consumption.

• Port Design:

Port design allows for top or bottom face seal and is molded for 1/4-28 UNF threaded fittings, as well as four head configurations.

• Chemical Resistant:

Structured to be inert to a variety of media with selected wetted components.

• Lightweight, Compact Size: Compact configuration allowing designers to minimize system weight and space

requirements.

• Flexible Mounting Options: Maximizes mounting flexibility by offering several mounting options.

FDA-Approved Materials:

Parker pumps and compressors are commonly used in FDA-approved systems.

Flow

T2-02

High Capacity Pumps (air/gas)

Up to 28.5 LPM Free Flow

Typical Applications

- Portable Aspirators
- Medical Instruments
- Fuel Cells
- Industrial Systems

The T2-02 is a high performance pump that features Parker's patented dynamic valve design. Remarkable performance and efficiency are achieved, particularly at lower loads. With flows up to about 28.5 LPM, this is the most compact, lightweight package in its class. The motor, pump head, and valve combination provide reliable, long life operation.

Features

• High Efficiency

The design has been optimized to provide the highest flowrates available with the lowest power draw, especially in vacuum applications. Low power leads to longer battery life and smaller instrument size.

Long Life

The wear components of these pumps have been designed to provide maximum life. • Small Size and Lightweight

The pumps fit into the tight spaces demanded of today's battery powered instruments. The lightweight design keeps instrument weight minimized. Ideal for today's handheld systems that were not possible with yesterday's technology.

Dimensions

T2-01 Up to 66 LPM Free Flow

High Capacity Pumps (air/gas)

Twin Head

Typical Applications

- Portable Aspirators
- Medical Instruments
- Fuel Cells
- Industrial Systems

The T2-01 high-performance pump, available in a single and twin head, features Parker's patented high-efficiency dynamic valve design and achieves remarkable performance and efficiency. With the most compact, lightweight package in its performance range, this pump is ideal for use in portable air and gas applications.

Features

• High Capacity:

The T2-01 pumps are capable of flow rates greater than 32 lpm with the single head and up to 66 lpm with the twin head.

• Motor Options:

T2-01 pumps are available with DC brush and DC brushless motors with integral controllers.

- Mounting Capabilities:
- The pump body is specially designed with durable mounting ears.
- Optimized Configuration:

Parker can configure the pump to meet specific requirements.

- Additional Features:
- Oil Free/Contaminant-Free Operation
- Pneumatic Termination: 3/8" Hose Barb
- Electrical Termination: Wire Leads

PPF MDP - 002/US Sept 2009

1. APPLICABLE LAW: This order shall be only subject to the terms and conditions set forth herein. notwithstanding any terms and conditions that may be contained in any order acknowledgement or other form of Buyer. Such terms and conditions of Buyer shall not bind the Seller unless accepted by it in writing whether or not they materially alter this order. This order shall be governed in all respects by the laws of the State of New Hampshire

2. TAXES: Prices do not include Federal, State or local taxes, including without limitation, which taxes may at Seller's discretion be added to sales price or may be billed separately and which taxes will, in any event, be paid by Buyer unless Buyer provides Seller with a proper tax exemption certificate.

3. TERMS OF PAYMENT: Unless otherwise stated on Seller's invoices, terms of payment shall be Net 30 days from date of invoice. If at any time Seller in its sole discretion determines an alternative pay-ment arrangement would be prudent, Seller may require Letter of Credit, Cash on Delivery, advance or other acceptable means of payment. If requirements of Seller are not met, Seller may cancel the order or any part thereof and receive reasonable cancellation fees.

4. DELIVERY: Seller shall not be liable for any delays in or failure of delivery due to acts of God or public authority, labor disturbances, accidents, fires, floods, extreme weather conditions, failure of any delays by carriers, shortages of material, delays of a supplier or any other cause beyond Seller's control. In o event shall the Seller be liable for consequential or special damages arising out of a delay in or failure of delivery. Buyer's requested delivery date or schedule shall be approximate and subject to Seller's acceptance

5. TERMINATION OF CONTRACT: Orders accepted by the Seller may be cancelled by Buyer only with the consent of Seller and upon payment of reasonable cancellation charges, determined by Seller in its sole discretion. Seller shall have the right without penalty or payment to cancel any order accepted or to refuse or delay the shipment thereof if (1) Buyer fails to make promptly any payment due, or to meet any other reasonable requirements established by Seller, (2) Buyer's act or omission to act delays Seller's performance, or [3] Buyer's credit becomes impaired, in the Seller's sole judgement. In such event, Seller shall be entitled to receive reimbursement for reasonable and proper cancellation charges

6. CHANGES IN SPECIFICATIONS OR DESIGN: If Buyer requests changes in specifications or designs relating to any goods, delivery schedules shall be revised if necessary, and an equitable adjustment upward or downward shall be made in price if warranted.

<u>7. FREIGHT:</u> Carriers will be selected by the Seller unless the Buyer instructs otherwise in writing. All shipments will be F. O. B. Seller's plant. Standard freight charges for equipment repaired under war-ranty will be paid by Parker Precision Fluidics. Buyers request for alternatives means will be charged additional freight as required.

8. CONSEQUENTIAL DAMAGES: In no event shall Seller be liable for consequential or special damages out of delay in or failure of delivery, defects in material, or workmanship or arising out of a breach by Seller of any other term or obligation of the Seller under this contract

9. GOVERNMENT CONTRACTS: If the products to be furnished under this contract are to be used in In the performance of a United States Government Contract or sub-contract, the government contract number, priority rating and a statement to that effect shall appear on the Buyer's purchase order. If the Buyer's purchase order includes all of said information and if said order is accepted in writing by an authorized officer of Seller with knowledge of said information, then those clauses of the applicable government procurement regulations which are mandatorily required by Federal Statute or regulation to be included in this contract shall be incorporated herein by reference; in all other events said clauses shall not be incorporated herein by reference.

10. PROPRIETARY INFORMATION: Buyer represents that is has adopted reasonable procedures to protect proprietary information as defined hereafter including binding agreements with employees and consultants of prevent unauthorized publication, disclosure, or use of such information during or after the term of their employment by or services for Buyer. Buyer shall not use proprietary information except as expressly permitted hereunder, shall not disclose proprietary information of Seller to any third party and shall not transmit any documents or copies thereof containing proprietary information to any third party except as may be authorized in writing by Seller.

11. PATENT INDEMNITY: Seller shall have no liability for patent infringement unless the goods furnished hereunder, in an of themselves, constitute the infringement. If they do, and Seller is notified of the class of infringement within ten days after such claim in generative the buyer and is permitted to settle or defend such claim, Seller will indemnify the Buyer against reasonable expense of defending suit and against any judgement or settlement to which Seller agrees. However, such indemnity will suit and against any judgement or settlement to which Selier agrees. However, such indemnity will be limited to an amount not exceeding the price paid by Buyer to Seller for the infringing goods. If an injunction is issued against the further use of the goods, Seller will have the option of either procuring for the Buyer the right to use the goods, replacing them with non-infringing goods, modify them so that they become non-infringing, or refunding the purchase price. The foregoing constitutes Seller's entire warranty and liability as to patents. If the goods furnished hereunder are in accordance with a design furnished by the Buyer, the Buyer will defend and hold harmless Seller from all cost, expenses and indements on accounts of any claim of infringement of any natent. and judgements on accounts of any claim of infringement of any patent.

<u>12. WARRANTIES: A</u> Equipment: Seller warrants that all equipment manufactured by it shall be free from defects in material or workmanship under normal use for a period of ne [1] year from date of shipment to Buyer and upon examination of Seller determines to its satisfaction that such equipment is defective in material or workmanship and such defect was not caused by accident, misuse, neglect, alteration, improper adjustment, improper repair, improper application, or improper testing. Seller shall at its option repair or replace the equipment, shipment to Buyer prepaid. Seller does not recommend it's products for use in life support systems.

B. The foregoing are in lieu of all representations, warranties and covenants, express or implied, with respect to the products and any defects therein of any nature whatever, including without limitation, warranties of merchantability and fitness for a particular purpose. Seller's sole and exclusive liability, and Buyer's sole and exclusive remedy, for any nonconformity or defect in the products in tort (including negligence), contract, or otherwise, shall be as set forth in Section 12A.
